# MOTIVES AND VALUES

## About Us

FDA is a Civil and Structural Consulting Engineering Company initially established in 1987 as Fellows Consulting. The firm has re-structured in line with government policy of Black Empowerment & is now 52% Black Owned as well as Level 2 BBBEE. Many government departments & State Owned Companies have remained our vital clients & rendering professional services to same has further strengthened the directors' resolve to re-structure & support government efforts to empower the Previously Disadvantaged Individuals.

Rachiel Agnes Dube, one of the 3 directors is a black woman whose qualities of self-drive; self-assurance & self-canonization have uplifted the company to rapid recognition & growth. She owns 30% shares & heads the combined departments of Procurement, Human Resources, Marketing & Administration.

Since its formation, the company has successfully completed over 4500 projects. We are well respected within the Built Environment because of our achievements & service & we are always open to join hands with our fellow South African & Continental professionals to form joint ventures. We place great emphasis on high quality, professional service, ethical behaviour and punctual delivery.

We are a client focused company, making sure that we meet individual client needs as best as we can, as engineering can be complex; we continuously seek ways in which we are both efficient and effective for the desired outcome. To improve our market share in the consulting engineering business throughout Africa, we strive to produce efficient cost effective designs within the time line given for each project. FDA thrives to uphold its core principles that are the foundation of our company's existence. Quality, consistency, transparency, integrity, accountability and team work is what we at FDA take great pride in.

## Our People

The company is actively run by the 3 directors as mentioned above. Our staff compliment is as follows:

- Engineers & Technologists – 6 No.
- Technicians – 4 No.
- Finance Admin – 2 No.

## Our Values

We focus on & strive towards empowering staff members and communities that we work with. Our staff is ever encouraged to enrol for post graduate studies as well as attend relevant courses in order to keep abreast with technological advancement. We periodically & consistently invest in design & CAD software to ensure modern design acumen, efficiency & speedy delivery. The company meets all the fees & expenses as part of staff empowerment & upliftment.

## Project Sheets

### Malapa Hominid Fossil Site Cover + Visitors' Platform:

"Australopithecus sediba" – arguably the most important hominid fossil – was discovered at "Malapa", a sensitive game reserve and UNESCO Cradle of Humankind World Heritage Site. This small, insect-like structure is designed to be a lightweight, 85% recyclable platform for visitors to the location, and for a one ton manual crane used by scientists to inspire the site. To preserve the site no foundations were permitted, and suitable rock footings for the platform 'legs' could only be approved by scientists during construction ensuring that it does not damage the sensitive area even after it is removed.

### Client:

WITS University School of Geosciences -South Africa

### Awards:

- ◆ **2014 - OVERALL WINNER OF STEEL AWARDS-SOUTH AFRICA**
- ◆ **2015 - SAICE VITAL ENGINEERING AWARD**
- ◆ **2015 - ISTRUCTE AWARD – LONDON**

## CORPORATE SOCIAL INVESTMENT

*Looking after and taking care of our children, doesn't start outside of your community, but starts within your own community- which is what we at FDA have done. Getting in touch with our conscience as members of the community has made us realize that we all have a role to play- not only within our own businesses and homes or sphere, but also outside. Reaching out a hand to one child doesn't take away anything from you as a person or as an entity. Once a year our office team attends a race at Khayalami as part of social interaction & team building.*

*All our 3 Directors are passionate about social engagement & helping the community around us:*

*Rachiel A Dube*

*Has served in various capacities at St Teresa's High School committees*

*Ndabezinhle Dube*

*Is a Board member at Grantley College*

*Peter Ian Fellows*

*Is a pro-active trustee and treasurer of the 'NATIONAL CHILD & VIOLENCE TRUST (NCVT).'*

---

*NCVT is a non- profit organisation based in Fourways, looking after violated, abused, poverty- stricken children grappling with inequality, unemployment and HIV/AIDS. The organisation ensures the well-being of the children's physical, mental and especially emotional support. The trustees are involved in providing psycho-social services through counselling, education, training and providing information on children's rights and responsibilities to equip children, women, and families for the survival of their well-being.*

## SOWETO EQUESTRIAN FOUNDATION

*In Soweto, we have recognized the 'SOWETO EQUESTRIAN FOUNDATION' which is a foundation that has taken an initiative to open the elite world of equestrian sports to people who never thought they would have such an opportunity, training them (including the disabled) to acquire skills in the equestrian world and to improve the welfare of the care of horses in Soweto- which is where we at FDA come in, we have donated our thoroughbred horse 'France Sweli Missy' to the Equestrian Centre and donate monthly to the home.*

*'AKANI- Every child can' home is based in Diepsloot looking after under- privileged children, of which their vision is to nurture the children physically, mentally, emotionally and spiritually- but most of all to empower them with knowledge. We have realized it is not about where you come from, but about where you are going, which is why we have become donors- to assist and contribute to these children's education in after-care and primary school.*

### TO WHOM IT MAY CONCERN:

#### **PETER FELLOWS: ENGINEER AT FELLOWS DUBE CONSULTING**

I met Peter Fellows of Fellows Dube Consulting in and around 1985, and have collaborated with him, on an ongoing basis, on both local and international projects.

His genius and creativity as an engineer have enriched my life, our practice and my architectural thinking, and we have collectively achieved many awards in both architecture and engineering including:

(For our project Malapa Fossil Cave Cover in the Cradle of Humankind):

#### **South Africa:**

2014 ASPTM Winner Tubular Steel Category

2014 Steel Awards Overall Winner – Best Steel Building in SA

2014 E-Afrisam Innovation award – Sustainability (Highly Commended) 2015 Modena Best use of Autodesk Design Technology -Runner up  
2015 Gifa Award of Merit

2015 SAICE - Vital Award (Engineering)

2016 SAIA Award of Merit

2016 SAIA Award for Excellence

2017 ECSA – Best Small Project (Engineering)

**Internationally:**

2015 International Property Association – Best Public Service Sector  
(SA) 2015 IPA Best Public Service Sector (Africa)  
And , of course, the **apex global engineering** award:

2017 ISTRUCTE Best Residential and Community Engineering Award

(And then, more recently, for our Meloding Township Pre-primary School, Virginia, Free State):

2019 Free State Institute of Architecture FSIA Award of Merit

**Other collaborations have included:**

Residential, (too many to mention)

Commercial (eg. Waterfall Wilds, Waterfall Estate),

Industrial (eg. SEW Eurodrive, Areoton),

Leisure (Poivre Island Luxury Resort,  
Seychelles) and many others.

I have no hesitation to recommend Mr Fellows as lead engineer on any project  
whatsoever as his lateral thinking skills are – in my view – unparalleled in this  
country.

Should you wish to verify details with me, please do not hesitate to contact me on 083 267 1817, or at  
[president@gifa.org.za](mailto:president@gifa.org.za).

Yours truly

Architect Krynauw Nel Pr Arch
